DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-11 are allowed because a comprehensive search of prior art failed to teach, as applicant has, a method for synchronizing a receiver wherein different tracking methods are utilized when a comparison of delay between a received signal and a delayed version falls below a threshold value so as to switch the tracking method of the delayed version to another tracking method with at least partially different sampling instances. The closest reference Farjh (US 5,978,423) found teaches tracking the received signal rays, determining the delay between the two signal rays, comparing the delay amount with a threshold value (T_{min}), and moving at least one updating value to another sampling position so the distance between the determined positions is greater than the smallest permitted distance. But fails to teach different tracking methods are utilized when a comparison of delay between a received signal and a delayed version falls below a threshold value so as to switch the tracking method of the delayed version to another tracking method with at least partially different sampling instances.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
